---

## About

- As a creative developer with a knack for turning app ideas into viable realities, I use my expansive personality to build cool web apps.

## Skills

### Programming

- Django
- Python
- Javascript
- Html
- CSS
- SQL
- (SQLite)
- Vue.js
- Htmx

### Languages

- English (iTep C2)
- Spanish (Native)

### Qualifications

- 2 + years back and frontend development experience.

## Work history:

### Freelancing and freebies

- Automated tasks for coworkers at Berlitz
- Designed, implemented, and deployed websites for clients.

## Education

- **Computer Science Degree at Universidad Del Valle. Cali, Colombia.**
  February 2019 — Present
- Tons of MOOCs from top universities, self-directed materials, and other sources.

## Projects

- **Notebook 2.0:** Personalized notebook web app for curating, organizing, prioritizing, and documenting tasks and ideas, tailored to my needs.
- **Tomatotimer:** Productivity tool based on the Pomodoro technique with Tkinter GUI and CSV database for task metadata, developed for learning and self-improvement.
- **Sanke.** Misspelled Snake game developed for a university course on programming foundations and design.
- **My portfolio website.** A dynamic web app displaying my projects, skills, and experience through a CRUD database and HTML templates.
